LIST OF EQUIPMENT		
quantity	model	description
1	MAV-240Z6	Amplifier 240 W, 100 V, zones & sound source
1	PMV-6Z	Microphone desk 6 zones
1	SMM-8SA	Prerecorded messages with time schedule
12	A-256BTM	Ceiling speaker 6 W, 100 V
1	SP-20	Sound projector 20 W, 100 V

Power calculation

Approximate area 500 m²
 Sales area (450 m²)
 12 x ceiling speakers connected to 6 W
 Repository (50 m²)
 1 x sound projector connected to 20 W
TOTAL: 2 x 6 + 20 = 92 W

Message Priority

One of the main characteristics of public address systems is the priority of the word over music. Public address amplifiers have differentiated inputs for each type of signal and include a system that detects the existence of a word signal (from a microphone or prerecorded message) and mutes the music signal.
